

## Additional Supplementary Regulations (i.e.The Rules!)

All normal road rules apply at all times. No exceptions.

There is no need to exceed the speed limit to achieve the set average speed.

Not every intersection will be shown in you Route instructions. You must follow the line of least deviation or stay on the most obvious road until you come to an intersection that matches your instruction.

Sometimes you will have an instruction just to confirm you are following the correct route.

There are no intentional spelling mistakes in the instructions. (i.e., no traps to be wary of.)

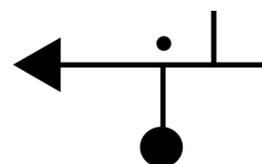

Road signs quoted may not actually indicate the road you need to take. Follow the direction given.

### TULIP DIAGRAMS

You are entering the intersection from the bottom of the Tulip. Marked with a large dot ●. You exit the Tulip in the direction indicated by the ►.

The '•' on the Tulip indicates where the sign should be.

Not all traffic islands will be shown at a roundabout.

The intermediate ODO figure will help to determine the correct intersection. They are far enough apart to be obvious. And you should be able to guess the difference between 0.7 KM and 7.0 KM.

Note: There will be slight discrepancy between total and intermediate distances due to min. 100m.

Ignore all no exit roads and private entrances.

If another competitor catches up to you, please allow them to pass as soon as it is practical and safe. They could be trying to keep to what they think is the correct average speed, and you holding them up will be more likely to disadvantage you.

### TIME CONTROLS

When you encounter a "TIME CONTROL", you must proceed to the control vehicle and park without obstructing other vehicles or the CONTROL sign. Your Navigator must exit your vehicle, with your time card, and go to the Control Marshal. When you hand over your card, the Marshal will stop the clock and enter your time on your card.

Note: If the weather is fine, the Marshal will be at a table beside their car. If it is raining, proceed to the passenger's side window and hand in your time card. If several cars arrive at the same time, please be patient. No queue jumping while waiting. But you can run to the Marshal point!

**NOTE:** There will be a 2 minute time allowance at Controls.

Please leave the Control in a considerate manner. Enjoy the roads and the views, and be considerate to non-competing vehicles.
